7 Academic Duties & Memberships

From 2004 to June 2007, I was an elected member, and as of November 2006 vice-chair, of the Board of Representatives of the Scientific Staff at U Bielefeld. I am expert for data protection and safety (though I don't insist in my own case). As member of this board, I was responsible for observing legal and organisational issues concerning university administrative and IT measures. I chaired or co-chaired all of the workshops listed in 6. It goes without saying that I am involved in reviewing papers for conferences and journals (Discourse Processes; International Journal of Language Resources and Evaluation; Journal of Logic, Language and Information). I am member of the Advisory Board of the South Asian Language Review. Further, I am a member of the following professional communities

- ACL
- Context Web
- Foundation for Logic, Language and Information (FoLLI)
- Gesellschaft für Analytische Philosophie (German Society for Analytic Philosophy)
- Gesellschaft für Kognitionswissenschaft (German Chapter of the European Society for Cognitive Science)
- International Association for Computing and Philosophy (IACAP)
- Gesellschaft für Semantik (Society for Semantics)
- ACL's Special Interest Group for Dialogue (SIGDial)
- ACL's Special Interest Group for Semantics (SIGSem)

8 Computer Related Skills

Corpus set up/processing	IMS corpus workbench, cqp
Database programming	SQL
DV editing	Ulead, Adobe Premiere, Fast DV.now
Server administration	Linux w/ Apache, samba, nfs, ssh, ldap...
General IT	XML, HTML, WML, RSS, CSS and related stuff
Programming	C(++), Java, PAL-III (very old-fashioned!), Pascal, Prolog <i>formal</i> languages are easy to learn.
Scripting	Javascript, Perl, PHP, XSL
Software	The usual Wind*s and Un*x/Linux stuff
Typesetting	L ^A T _E X, PostScript

9 Non-professional things I do

Hiking	Most things that have to do with being outdoors are things I love. I use to organise (short, nothing demanding) hiking tours during conferences whenever possible. Besides hiking, my other favorite is biking: I love to ride motorbike, e.g. during vacations.
Martial Arts	I love to practise Aikido, a Japanese self-defense technique, partly with Bo-ken (wooden sword), but mostly with Shin-ken (real sword).
Movies	Years ago I used to run a cinema together with friends of mine. I was always into movies and had a specialisation in French and Japanese movies those days.
Photography	Portraits, nudes and industrial architecture are my favorite subjects when it comes to photography. I preferably do all the chemical and dark room work by myself.
Social welfare	I am involved in a number of organisations which take care of unemployed and unsheltered fellow men.
